- HTML/CSS/SASS
- Node.js
- Vanilla JavaScript
- React/Angular/Vue
- React Native
- Next.js
- Postgres
- MongoDB
- Database Management/ headless CMS
- Ajax

INTERESTS

- Art
- Cycling
- Woodworking
- Crossword Puzzles
- True Crime

EXPERIENCE

FREELANCE FRONTEND DEVELOPER
April 2020-present

As a freelancer, I work closely with clients to create their custom sites and apps. Each site is made to be both accessible and responsive on various browsers and devices.

SENIOR SCENIC ARTIST
June 2018 - March 2020   Solomon Group

While at Solomon Group, I worked with teams across multiple departments to create one of a kind elements for museums and live events. I also led teams on site and in the warehouse to install fabricated elements and finish them to perfection.

LEAD ARTIST
December 2015 - June 2018   The Walls Project

I worked with a diverse team through the design, fabrication, and installation phases to create exactly what the client wanted and to their specific on site specifications - outside of a NICU.

PROJECTS   🌐 stephaniegibby.com

PATIENT TELEPHONE SUPPLY

I updated the existing site to a decoupled architecture with a headless CMS which allows the client to be able to easily update their products. Along with that, I updated the color scheme to meet the medical industry standards and made the site responsive.
Tech Used: Next.js, React Bootstrap

DESIGN AND A MOVIE

Design and a Movie is a responsive app featuring movie illustrations. The user can register, log in, explore the movie drawings, find out movie stats, and even add favorites to their profile. I developed the front and back end which included creating a REST API and setting up the server side including security.
Tech Used: React, React Bootstrap, Node.js, Express, MongoDB

EDUCATION

FULL STACK IMMERSION
CAREER FOUNDRY
2020
A year long intensive course on full stack development with an emphasis on front end.

BACHELOR DEGREE
LOUISIANA STATE UNIV.
2012
Bachelor of Fine Arts with a concentration on photography and sculpture.
